SUMMARY

I am a MERN Stack Developer with over 2.8 years of experience focused on crafting responsive web applications and optimizing UI/UX designs. I have successfully led the development of multiple applications that significantly enhanced user experience and customer engagement. Known for my ability to diagnose and resolve operational issues efficiently, I've contributed to improved application performance and satisfaction ratings, showcasing my commitment to delivering high quality products.

STRENGTHS AND EXPERTISE

HTML	CSS,Tailwind CSS	Java Script
React.js	Node.js Redux	Express.js Redis
MongoDB	Remote Dictionary Server	Cache Git & BitBucket
Fast API's		

PROFESSIONAL EXPERIENCE

October 2025- Present

ARHASI LABS PRIVATE LIMITED

Front End Developer

Software Engineering company focused on web development

- Integrated 3 third-party APIs, improving data retrieval functionality and boosting application performance by 15%.
- Built responsive and user-friendly interfaces using React hooks, and state management, resulting in a 40% increase in customer engagement.
- Co-ordinated in managing version-control through Git, ensuring clean and conflict-free code for 100% of team projects.
- Identified critical bugs within the software architecture and implemented effective fixes; secured a measurable increase in application uptime of 20% while maintaining consistent performance during peak usage hours for users.
- Coordinated comprehensive weekly code assessments to confirm adherence to team-wide coding protocols, resulting in a measurable 15% decline in reported issues post-deployment across all projects.
- Collaborated with UI/UX designers to translate complex design systems into high-performance, pixel-perfect components.

LYROS TECHNOLOGIESPRIVATE LIMITED

Apr 2023- Oct 2025

MERN Stack Developer

- Developed and maintained web applications by utilizing both front-end and back-end technologies.
- Utilized React and Redux for the web application, ensuring an user friendly and responsive user interface
- Developed and implemented a Node.js API with MongoDB as the database and utilized Express.js for server-side logic.
- Built Cross Platform websites using React and Node AP

PROJECTS

Project #1

Domain: MLM (Multi-Level Marketing)

Created engaging interfaces on an MLM platform allowing users to easily navigate through offerings; achieved high levels of satisfaction as reflected in a feedback score averaging above 4.5 out of 5 from early adopters

- Developed a Multi-Level Marketing MLM platform using React.js, Node.js, MongoDB, and Express.js; onboarded over 500 users within three months while ensuring application performance met strict uptime requirements
- Integrated secure user authentication with hashed passwords, cutting unauthorized access attempts by 50% Designed and delivered 100% cross-device compatibility with a responsive layout using CSS3 and Bootstrap, increasing mobile user retention by 35%

Project #2

Domain: HRMS System

Secure HR system with payroll, leave & access control.

- Developed a secure HR management system with two-layer authentication.
- Implemented Excel upload to populate employee data.
- Designed role-based access for managers and employees.
- Built a leave management & approval system with real-time tracking.
- Automated salary processing, including salary slip generation and email notifications.
- Integrated attendance tracking, onboarding, and an employee hierarchy system.

Project #3

Domain: LMS (Learning Management System)

Role-based learning platform with courses & tracking.

- Built an authentication & role-based authorization system for Admins, Teachers, Students & Staff.
- Developed a course creation module allowing rich text, images, and videos.
- Implemented an assignment system with student progress tracking.
- Designed a teacher dashboard to monitor student engagement.

EDUCATION

Dr Lankapalli Bullayya College of Engineering **2020 - 2023**
